

Rat Rope ladders.

Rat rope ladders can be made out of old fleeces/towels or bed sheets. Scissors will be needed therefore, parental guidance is advised where needed.

Step one: Take one or two old towels and cut into 3 even strips then fold in half length ways.

A.

B.

Step two: At one end tie the three stripes of towel in to one Knot.

Step three: plait the three stripes tightly until you have reached the end. Then tie into a knot again at the other end.

Once this is completed the rope can then be attached to the inside of a rat cage for them to enjoy.

Alternatively, you can also make these ropes for mice using smaller lengths of material.
