Chairman's statement

Another year passes, with another set of challenges being presented. This report, like others over recent years, reflects an organisation that is working very hard to support pets and owners, and in very challenging circumstances.

It has been a year of two halves. The first part was still influenced by the behaviours of people coming to terms with the pandemic, while many people learnt the joy of a pet for the first time. The second part was significantly impacted by people returning to work and adjusting to an increasingly challenging economic climate. It is this latter development that shows no sign of abating and is more likely to get much worse before it gets better.

We knew the desire to have a pet would plateau at some point, but the combination of returning to work and financial hardship has meant that the need for Woodgreen's services is more evident than ever, so we've had to up our game. Everything seems increasingly desperate, both for pets and their people. It is not necessarily the amount of requests, but rather the need in each request that is becoming more profound. There was a bigger need for more complex care, and a lack of suitable homes for pets with greater requirements. And there were people at their wits' end because they couldn't afford to keep their companion. Indeed, there were countless occasions last year where our intervention was a life-saver. Things are unlikely to get better soon, but that is why we are here: to make a difference.

During 2022 we recognised that to do more, we need to be clearer about who we are and the support we provide. We also want to reinforce our position that to support pets in a more rounded way, we need to work with and support people, both existing and potential pet owners. So, whilst the presentation of Woodgreen hasn't changed for a long time, our services have, both in breadth and sophistication. That is why we felt that the time was absolutely right for a rebrand, to promote the dual focus on "pets and their people", and at the same time maintain the bias towards

the welfare of the pet. Despite the challenges that the year brought, we wanted to raise our profile and present ourselves in a different way to achieve more. The timing of this also coincided with another highlight of what was a hard and demanding year, which was the BAFTA nomination for Channel 4's "The Dog House". Centred on our Huntingdon site, the programme provides just a slice of what we do but it does not hold back on the excellent level of care we give to dogs. Whilst we may not have won the BAFTA, I was nevertheless extremely proud of the team that supported the programme and the way it highlighted what an amazing job everyone at Woodgreen does.

Looking ahead, the external context in which we operate looks very uncertain and extremely challenging. The economic realities will also impact on pets and their people. We anticipate more demand for intake, but less opportunity to rehome. This in turn means that we will need to provide more support to keep pets in homes, at a time when we will likely have more demands on our funds than we are able to service. Despite this, we have reason to be positive about our ability to do more and have a greater impact. We recognised that 2021 was perhaps a crossroads in terms of what the future need of Woodgreen might be. We will always have pets in our care, but the past few years have shown that we can and will do more in how we engage with people, to ensure that the need for care is minimised and pets stay in homes with their owners. To that end, in 2021 we started writing our Pet Services Strategy and consulted with audiences both outside and inside the charity. With key principles set out in the strategy, next year we will look to implement it, designing and delivering more impactful

services. We feel that, despite the challenges, at a time of most need, Woodgreen's ambition and strategy means we can deliver more impact and in a more efficient way.

Last, but certainly by no means least, I have got to mention the Snowden Cat Care Centre. With leading edge functionality for such accommodation built into the design, it sets a standard that is difficult to match and is the envy of our peers. Amongst other things, its climate control system has already proven to be invaluable during the recent heatwave. The building is testimony to the level of care we want to provide and a tribute to Sheila Snowden, whose generosity in the legacy she left made it happen.

A handwritten signature in black ink, appearing to read "Steven Carden".

We present our Trustee Report
and Accounts for the 12 months
to the end of March 2022

Strategic Report

Who we are

Wood Green Animal Shelters operates under the trading name of Woodgreen Pets Charity (Woodgreen) and has been successfully caring for pets in need since 1924. We care for any pet that needs us, whether they have been abandoned, neglected, are vulnerable or simply need a home. At the same time we guide people to find the right pet for them and encourage the best standards of pet care.

Our vision

Our vision is for every pet to have a home where they are loved, well cared for and enjoy positive relationships with their owners.

Our Objects as stated in the Articles of Association are that

Woodgreen exists to provide:

- the relief of need of pets through care and rehoming;
- the education of the public as to responsible ownership and care of pets.

Our mission

Our mission is to care for vulnerable pets. We are committed to providing our pets with outstanding care and secure and loving homes and supporting pet owners and the wider community to build rewarding relationships with pets.

We do this through digital engagement and through our operations at our rescue centre, veterinary surgery, kennels, cattery, small animal centre and fields outside Godmanchester near Huntingdon.

In addition, our Community Outreach team based at Godmanchester work extensively throughout the region with schools and community groups to spread the responsible pet ownership message.

Our strategy

In order to achieve our Mission the Trustees have agreed a strategy with the following goals:

- To ensure that pets and pet owners in need of our help are never turned

away.

- To provide high quality care for pets in need of our help.
- To champion and increase responsible pet acquisition, ownership and relinquishment across the UK.
- To build a robust and resilient organisation.
- To be known and recognised for what we do and our impact.

Consideration of Directors' responsibilities

Under Section 172 of the Companies Act 2006 the Board of Trustees, as Company Directors, have a duty to promote the long-term success of Woodgreen. They have done that during the year by duly considering the impact of the decisions they make on the future of the organisation. They have listened to the views of different stakeholders who will be affected by their decisions and have weighed and considered the alternative options that were available to the organisation on each occasion. The Board believes they have acted in the best interests of the charity and in a manner which will bring about long-term success. The Directors consider the key stakeholder groups for Woodgreen to be its service users, financial supporters, employees and volunteers, its partners and its suppliers. The content within the rest of this report explains how Woodgreen engages with its stakeholders more generally.

During the year the most significant decision made by the board that will have a long-term impact on stakeholders, was to be much more explicit that the mission of Woodgreen is to support pets and their people. The rationale for this decision is explained elsewhere, but it was spearheaded by two key pieces of work. Firstly, the creation of an updated Pet Services Strategy that seeks to explain the importance of working with pet owners, or potential pet owners, as well as the pets themselves. Secondly, they refreshed the Woodgreen brand and introduced a new strapline – helping pets and their people. Both pieces of work involved consultation with relevant internal and external stakeholder groups and have been well received.

The board works very closely with the Executive team, in particular, through the sub-committees of the main board, which are covered later in this report. The Directors ensure that Woodgreen engages with the sector in a mutually beneficial way through participation in various sector groups such as the Association of Dogs and Cats Homes. Woodgreen also believes in developing strong partnerships with its key suppliers and this approach is embedded in its procurement policy.

Besides the organisation refocus discussed above, the board has been working to ensure that Woodgreen emerges into the post-pandemic world in a financially sustainable position. This has been achieved by integrating the implementation of the Pet Services Strategy alongside the fundraising strategy and a long-term financial plan.

Achievements, performance and future plans

How did the demand for services look during this period?

Woodgreen's Pet Support team handled **56,700** pet related enquiries, with over **32,000** people contacting us through our dedicated helpline and a further **21,620** by email or social media channels. Our approach is to match the appropriate service to the pet and owner's need. Like NHS 111, our team talk to the owner to get a detailed understanding about their situation, and that of their pet. This enables us to triage them into the best service.

Many people reach out for help without knowing about the full range of services that we offer. They often don't realise that we can help owners keep their pets if this is in the best interests of the owner and the pet, so it's vitally important to make them aware of this. This also means that we can prioritise those pets who need us the most through our direct care services.

We took 2,282 pets directly into our care:

861 cats,

636 dogs

**and 785
small pets.**

**263 of these
pets were strays.**

- **We placed 1,392 pets with Woodgreen fosterers.**

The charity now has around 200 foster volunteers that have helped increase the number of pets on foster by 9% compared to 2020/21. Fostering gives people peace of mind that their much-loved pet will continue to enjoy home comforts while being assessed and waiting for their new home. It is also vital for supporting pets with complex medical or behavioural needs.

- **We supported 241 pets through Owner Home Care (73% increase on 2020/21).**

This service enables pets to stay in their home while we seek a new home for them. It is a great alternative to rehoming privately and also helps to reserve our onsite capacity for the most vulnerable pets who need more specialist care. We had previously struggled to include rabbits due to the high level of dental disease occurring in this species and our need to ensure pets are fully health checked and neutered (where appropriate) before rehoming. Our lead vet worked with our teams and a process was implemented so that rabbits, some of our most in need pets, could use the service. This meant we were able to take in 57 rabbits last year – a huge increase on the 2 we had been able to accept the previous year.

- **We collected 265 pets from homes through our Pet Collection service.**

This is a lifeline for pets in urgent need of our help, as we can bring them into our care if their owner is unable to do so.

- **We successfully rehomed 1,615 pets, with over 99% staying in their new homes with the support of our team.**

We also developed a new post-rehoming support programme. This included the provision of essential items such as enrichment feeding toys, treat pouches and scratching posts to support the delicate settling in period for pets starting a new life. We also made it easier for new pet owners to reach out and engage with us for advice and guidance in the early days of ownership. We achieved this by putting in place catch-ups with our team at various points after their rehoming day. These occur on day three, week three and then the three-month mark. The early feedback we received suggested this helped people feel comfortable asking us for help and support, which gives a pet and new owner's relationship the best chance of long-term success.

A match made in heaven: Biscuit and Munch

What makes a pet truly happy? For many, especially our smaller furry friends, it's companionship.

Woodgreen's mixing service plays a big part in bringing pets like these together. It enables owners to bring their small pet to Woodgreen and introduce them to an animal of the same species. Then, if sparks fly between the pair, we can rehome them with their new friend.

As you can imagine, it's not always without its hiccups. Biscuit, a three-year-old dwarf lop rabbit, had no less than three mixes before finding 'the one'.

She'd been handed into Woodgreen by her owner, who was emigrating and sadly unable to take Biscuit with her. Aside from her claws needing a clip, Biscuit was in good health and ready to hop into a new home. The challenge was finding one with another rabbit who she would bond with! After the unsuccessful attempts to mix Biscuit (she's very particular about her choice of new friends), we found her the perfect match at our centre. That rabbit was Munch, a two-year-old Harlequin cross. "They hit it off right from the start", says Charles, small pets team manager.

While waiting for a new home, they stayed with Woodgreen fosterer Laura, who said:

"They're great together and are always following each other around. You'd think they've been best friends all their lives."

We're delighted to say the pair were rehomed together in June 2021 – the happy ending they truly deserve.

Vinnie

Vinnie was an emergency arrival at Woodgreen in March. He'd suffered a serious injury to his third eyelid and his owner was unable to afford the veterinary treatment he needed. We took him straight into our veterinary surgery to have his eyelid repaired, where we also neutered him under anaesthetic. After his surgery, Vinnie was given a course of pain relief and antibiotics – everything he needed to help him heal and get back on his paws.

During his recovery period in our Cat Care Centre, it made the world of difference to have large spaces for Vinnie to easily explore whilst wearing a buster collar. The controlled temperature and improved ventilation system also meant that the healing process was much more comfortable for Vinnie. Before long, he was fully recovered and today he's loving life in a new home.

Mamba

Mamba is a beautiful Labrador whose owner reached out for our help earlier this year. Mamba is a support dog who is trained to assist her disabled owner. She has limited mobility, and her canine companion would help with bringing her the medication she needed each day. But when Mamba developed a skin reaction and pain in her neck, she was no longer able to do this. The roles were reversed, with the owner now needing to support Mamba like her four-legged friend had always done for her. A local vet advised that Mamba should be bathed twice a week and put her on

a course of pain relief to help with her neck. Unfortunately, her owner was physically unable to do the bathing – and this is where our Community Outreach team stepped in. We helped with the bathing of Mamba using medicated shampoo to help relieve any discomfort she was experiencing. We then made arrangements for a professional groomer to do a full coat strip (removing dead hairs) and assist with future support. As you can see, Mamba's coat is now looking glorious – and she is a lot happier too!

To help more pets, it is important to minimise their length of stay with us. This has reduced over the 12-month period between April 2021 and March 2022 for dogs and cats, while for small pets it has increased due to external circumstances, which are explained below.

From a rehoming perspective, the increasing cases of dogs and cats with complex needs coming into our care, both behaviourally and medically, have made it challenging to find them the right homes as quick as we'd like to. Pets who will need a higher level of training or medical support in their new homes have remained in our care for prolonged periods of time. And, unfortunately, there is often a lack of interest in them among pet seekers.

- Our small pet species have been impacted by medically enforced rehoming lockdowns to prevent infectious disease spread, particularly rabbits and chickens. This has resulted in a significant increase in their length of stay.
- Our pets needed **17,618** veterinary interventions, from vet and nurse consultations to medical procedures and diagnostic work.
- We carried out **1,833** operations, ranging from routine neutering and dental procedures to more complex orthopaedic and joint surgeries.
- Our partnership with the Royal Veterinary College, the number one vet school in the world, has continued to add value to our care provision. The vets they supply to us are of a high calibre and fit well with our teams. We enjoyed welcoming **122** final year vet students for placements. This gave them the opportunity to learn about shelter medicine and the work the charity does to support pets and people.
- We've been welcoming volunteers back on site this year. Between 30 and 70 registered volunteers provided support each month across our three pet care departments. We also trained seven of our cat volunteers in 'barrier nursing' cats to support our Cat team with the ongoing vaccine shortage. This ensured those vulnerable cats we couldn't vaccinate were safeguarded. However, the landscape seems to have changed after the pandemic and many of our previous volunteers have decided not to return or to reduce the time they can offer us. Volunteering is so important to providing extra support and care to our pets. It also offers opportunities to individuals to gain valuable work experience or improve their health and wellbeing. Over the next year, we will be focusing on attracting new volunteers as well as supporting our loyal, existing ones.

Being there for bunnies: Ronnie and Roxie's story

When the owner of two 'female' rabbits – Ronnie and Roxie – discovered a litter of four babies, it came as quite a shock! After finding out Ronnie was a male, he was separated from their shared accommodation – but this seemed to have an effect on Roxie. She'd lost her long-term companion, and rejected her babies. Sadly, two of them passed away. But with our support, their owner was able to hand rear the remaining two, and they flourished.

Although Ronnie had been moved, it was likely Roxie could be expecting again. And before long, another four bunnies arrived! We offered to bring mum and her babies into our care, and give them the best possible start. This meant Roxie could stay with her little ones while enjoying some extra space to stretch

her legs. To prevent any more surprises in the future, we also provided the owner with a voucher to help with the cost of neutering Ronnie.

Once the babies were ready to be rehomed, we found the perfect matches for them. We then neutered Roxie and arranged for her to return home, where she was reunited with Ronnie. But their bond wasn't the same anymore and they didn't seem happy. Despite our best efforts, we couldn't rekindle their friendship. Fortunately, though, the two babies from the first litter were male and female, so it was still possible to split the group into two mixed pairs (usually the best way with rabbits). They got on great together, which meant all of the rabbits could stay in the home!

Jude and Darla

This exuberant brother and sister duo arrived at Woodgreen in February 2022 after the dog in their original home had attacked the pet rabbit, leaving the owner concerned for the five-month-old kittens' safety. A head-to-paw veterinary check confirmed the pair were in good health, and they were neutered to prevent unexpected litters.

Adaptable spaces in our new Snowden Cat Care Centre meant that Jude and Darla could stay together in two interlinking units – and their carers said they had “the best time” playing together. The kittens had not been given outdoor access in their original home, so they also enjoyed venturing outside for the first time in one of the secure cat gardens. Jude and Darla have since been rehomed together, and we couldn't be happier for them.

We supported 4,837 pets in homes across communities and beyond:

- We delivered 1-2-1 behaviour and training consultations to owners of **994** dogs, cats and small pets, which is a **21%** increase compared to last year. Our friendly pet specialists give pet owners free advice, training and behaviour support to manage challenging problems. The support and guidance we provide is grounded in our real-life experiences directly supporting pets in need. It also reflects the latest developments and research in pet welfare. The demand for these services has increased significantly as pet owners' routines change to a 'new normal' following the pandemic.
- **83%** of users of our behaviour advice and guidance were able to keep their pets and go on to have a more positive and fulfilling relationship.
- The most common reasons for people to seek advice for dogs were anxiety, aggression towards people and other pets. For cat owners, the primary concerns related to house soiling and aggression to other pets. Many owners were also reporting multiple issues, including the aforementioned. For our smaller pets, advice was most commonly sought about mixing (introducing pets with a view to housing them together), and handling.
- In November 2021 we introduced a new assessment model within our community outreach work. This enabled us to support pets with all five of their welfare needs rather than just the initial ask for help from their owner. As a result, we have seen the number of interventions we give to each pet increase across the year, leading to a greater impact on pet welfare and wellbeing. And we anticipate a longer-term positive effect on pets. This is because providing advice and support which addresses all of a pet's needs will reduce the risk of them becoming vulnerable in the future.
- We spent a total of **£41,293** subsidising pet care essentials for pet owners in local communities. This vital support helped them with meeting the costs of pet food, urgent veterinary care, microchipping and preventative treatments. Other financial contributions were supported by successful grant applications from the Bissell Trust towards neutering costs, as well as corporate partners donating pet food.
- We financially supported the neutering of **256** pets in the community by working with Cats Protection and the RSPCA on two "Trap, Neuter and Release" programmes for feral cats. In addition, we used our own facilities to support the neutering of a further **125** cats.
- A total of **1,022** pets were given vital supplies of pet food through our partnerships with three local foodbanks. As well as food packages to support pets for around five days, the foodbanks served as an important referral point into the rest of our community outreach services for local pet owners. A fantastic team of volunteers supported us in collecting food donations, making them into food packages and delivering them to our food bank partners.
- Our first post-covid proactive community outreach programme work saw us offer Health and Wellbeing Clinics to owners across one area of Littleport (East Cambridgeshire) between February and March 2022. This is an area identified as having high levels of deprivation and a large pet owner

population. A total of **59** pets received free Health and Wellbeing Checks, plus follow-up interventions. This was an increase of **65%** in the number of pets we helped in the same area across the two months prior to our activity. Ongoing support in the area is being provided through local social media channels, word of mouth and support via the local foodbank.

- For the first time, we have utilised five volunteers in the customer contact area to allow experienced staff to focus more on how we can help keep pets in homes and move the process along more quickly, therefore meeting customer expectations and providing support where possible.

We supported 9,513 people in their pet ownership journey, helping to set them up for success while also detecting and preventing any issues in the future. A further 619,178 people actively engaged with our pet advice online content:

- **1,352** pet owners attended our live online workshops and classes – Reactive Dog Training being the most well-attended. Feedback from attendees has been overwhelmingly positive, with pet owners rating it 5/5:

"It is wonderful to have this resource to turn to and the ability to ask and hear questions. This helps build a bigger idea of what to do."

"I have really enjoyed the workshops and for the first time in 15 months had a walk with Mabel, with no lunging after using some of what I'd learnt."

"We thought the presentation was excellent and certainly covers the behaviour we experience with our dog – we'll be trying out the techniques explained."

- A total of **878** people engaged from all around the world in our self-led e-learning content which covers dog, cat and rabbit ownership and care.
- A further **284** families engaged in our digital workshops on dog and rabbit ownership and care.
- While Covid still played a part in disrupting our school-based education, we were able to reach **2,790** school children face-to-face and **4,209** children digitally.
- A huge **34,502** downloads of our online self-led classroom sessions were recorded from the TES website. www.tes.com
- **619,178** people accessed our online pet advice, which represents one in eight people visiting the Woodgreen website. For those who took a survey included in each article, **90%** rated it as really useful advice.

Emori

Poor Emori was involved in a road traffic accident which left her seriously injured. She was then taken to a vets where they had no choice but to amputate her leg. Her owner, who'd had a change in lifestyle circumstances, was no longer able to keep her so they handed Emori into our care. As you can imagine, she was nervous and still quite shaken up by her experience when she arrived. But our teams spared no effort to give her everything she needed to settle, and get her road to recovery off to the best start. Whilst we searched for a match, she benefitted from two separate stays with Woodgreen fosterer Charli and then Emily. They helped her to gradually build up her exercise, and she went from strength to strength – paving the way to a loving home with her new owner, Pauline.

Inka

When Inka started showing signs of a serious skin condition, her owner became very worried about what the problem might be. Inka had been increasingly itching her skin, making it very sore. But her owner wasn't able to afford any veterinary treatment for her at the time, so they contacted us for help. We supported them with the cost of a consultation and treatment including medicated shampoo. In addition, we provided ongoing advice about a change in Inka's diet to help prevent future skin issues, with an allergy being the likely cause. Over the course of eight weeks, we kept in touch and made a home visit to ensure Inka's recovery stayed on track. And soon enough, she was given the all clear!

Loki

Loki the kitten was found alone on a restaurant barge in Peterborough during the early hours of the morning. We don't know for sure how he ended up there, but it's possible he was abandoned. Loki's finder took him home and did a great job of looking after him, guided by our support, before he was brought into our care. After a stay with one of our fosterers for some extra comfort and TLC, this friendly feline was found a home.

Felix

Ten-year-old Felix came into Woodgreen's care in February after his owner sadly passed away. Felix was extremely overweight at 9.7kg. The fur on his back was matted, as he was unable to clean himself properly. We put him straight on a weight management diet and clipped his matted fur. He also required a dental procedure to remove some rotten teeth.

Despite his size, large units in our Cat Care Centre allowed Felix to move around comfortably, with plenty of space to exercise and explore. After just a few weeks, Felix's weight was down to 9kg. Since then, he's found a loving new home where he's continued to stay on track with his weight loss plan – giving him a healthier, happier future.

Bella

Six-year-old Bella is a lovely Lurcher who was brought to Woodgreen in April 2021 by another charity. They weren't able to give her the time and resources she needed, so they entrusted her into our care.

Woodgreen's dedicated teams have spent more than a year helping nervous Bella build her confidence around strangers and other dogs, as well as tackling her separation anxiety. She's currently in a foster home with Clare, one of the charity's amazing volunteers. Clare said:

"Bella is a cautious dog who responds well to patience and a positive approach. Once comfortable, which doesn't take long at all, she is so affectionate and laid back. She is very bright and loves the challenge of puzzles and magic tricks involving hiding treats."

Lil' Diego

When the owner of Lil' Diego the cat faced the possibility of having to give him up, she called us in tears.

She'd taken her feline friend to the vets for neutering, but they found he had a urine infection. Not only that, but he was also due his vaccinations. And with finances tight, his owner was unable to pay for everything. We wanted to help keep them together in any way we could, so we offered to contribute towards the costs. This meant he was able to get all the veterinary care he needed, and stay with his adoring owner. We also offered them some advice on what activities to do with him whilst he recovered from his neutering procedure.

Lil' Diego is now back to living life to the full, and his owner couldn't be happier.
"I appreciate everything you have done – Lil Diego means so much to us."

The broader picture – what were the highs and lows for pets?

Demand for pets dropped significantly, with pet seekers decreasing from 68,906 last year to 15,565 this year. The most significant drop was the demand for our dogs.

- We started to hear from more owners who were experiencing problems with their pets. For many, this was because of a change in their routine and home environment as life returned to a new normal and we gradually emerged from the pandemic.
- Pets in need of intake were suffering from more significant medical and behaviour problems. This meant they need a higher level of care, and also made it more challenging to place them in new homes. These type of pets often receive a lack of interest.
- Despite this, there has been a gradual decrease in pets' length of stay over the 12-month period between April 2021 and March 2022 for dogs (75 down to 64 days) and cats (53 down to 39 days). Yet, there was an increase for small pet species (88 up to 99 days). However, pets' length of stay is still greater than pre-pandemic times.
- Demand for advice services and engagement with our workshops and classes increased. This is a positive sign which suggests many people with pets wanted to give them good care and welfare and prevent issues occurring.
- With animal numbers increasing on site, we've continued to be vigilant when it comes to infectious diseases. We put measures in place quickly and efficiently when these issues have posed a threat or affected our pets in any way. Fortunately, we have only had occasional, often isolated incidents including rabbit viral haemorrhagic disease, Coccidiosis, and Parvovirus. When the largest ever outbreak of Avian Influenza hit the UK, with over 60 cases confirmed across the country between November 2021 and February 2022, we placed all of our chickens in 'lockdown' for a lengthy period. Whilst this meant they couldn't

enjoy their new run areas which were added as part of a recent small pets refurbishment, they were reintroduced to these areas as soon as restrictions were lifted in May 2022.

- Another trend we have seen this year is an increase in dogs being relinquished which have originally come from outside of the UK. These dogs were imported during the unprecedented demand for pets during the height of the pandemic. In 2020, there was a 51% increase in imports of young rescue dogs from Romania compared to 2019. During December 2021 and January 2022, we admitted 24 dogs born outside the UK. We already have some disease screening in place for certain non-UK diseases to safeguard pets and people. But during this time, one of our main areas of focus was identifying an effective Brucella test to help our risk management against Brucella Canis (a contagious bacterial infection). In February 2022, more than 40 cases were reported in UK dogs imported from Romania.
- In January we saw the end of an era, with our last two resident goats, Bramble and Willow, sadly euthanased due to their age, worsening arthritis and general welfare. Moving forward, the barn and adjacent fields will be for chickens and other domestic fowl.

A tail of 23 rats

When the owner of a few rats found themselves with 23 after an accidental litter, they turned to Woodgreen. They'd been struggling to care for all of them and needed urgent support. Woodgreen outreach officer Serena made an emergency home visit the next day. The first thing she did was separate them to prevent any more potential accidents. She also assessed the situation and talked through how we could help. Serena's recommendation was that the babies came into our care immediately, so this was swiftly arranged. Since then, they've all been found loving homes. And we'll always be here for any advice or support their original owner may need in the future.

Felix

Golden oldie Felix lives with a recently retired gentleman who describes his feline friend as being his 'entire world'. So you can imagine it would have been a huge shock when he found Felix collapsed and struggling to breathe. He was rushed to a local vets for critical care but his owner couldn't afford to cover all of his treatment costs. And there were no guarantees whether this treatment would even work, but it was his only chance of survival. When we received the call from Felix's owner, we just had to help in any way we could. We contributed some money towards the costs so Felix could get the urgent care he needed. And a few weeks later Felix defied all the odds and made a full recovery.

Felix needed ongoing medication, so to help ease the impact of future costs we donated pet food that would last a few months – plus a toy for good measure! It was so wonderful to see Felix happy, healthy and back in the company of his favourite human.

"I cannot thank you enough for your help. If there were more people like those at Woodgreen, the world would be a better place."

– Felix's owner.

Oreo

This is Oreo, a sweet nine-year-old Labrador cross. She's been waiting over 400 days for a new home – and we're not giving up on finding her the perfect match.

When his wife very sadly passed away, Oreo's owner was no longer able to meet her needs, so she was brought to Woodgreen. After leaving everything she'd ever known, Oreo was understandably a little sensitive and also didn't seem comfortable around other dogs or children. But once she's bonded with you, Oreo is full of personality and incredibly affectionate.

While waiting for the perfect new owner to come along, Oreo has been in the care of dedicated Woodgreen fosterers Alison and Taff Squire. Taff said: "Oreo is the best dog ever because she's so loving, and she's settled into our home really well. We've got closer and closer to her over the last few months and she's a real joy and comfort to be around."

When two rabbits became 24

Last year, we were contacted by a new pet owner who acquired rabbits for companionship during the pandemic. But things got out of control when two rabbits soon became 24! Despite doing her very best to care for them all, it was too much to cope with. She tried to rehome them but didn't have any luck, so she reached out to us. Our teams pulled together to take in 22 of the rabbits; they also health checked and neutered them. This left the owner with two – the original mum and one of her babies (who was also female, ensuring no more babies).

"It was so rewarding to help keep them in the home with their owner so she can continue to enjoy their company,"

– Woodgreen outreach officer, Jo.

Some of the projects we have been working on

- **Pet Services Strategy 2022 – 2025:**

In September 2021, we started work on our Pet Services Strategy to complement the broader Organisational Strategy and give our frontline services a directional focus, as well as a roadmap for the next three years. Using relevant pet and pet owner research, our own insights, sector and peer analysis, and lots of internal discussions and feedback, we finalised the strategy in March 2022. The infographic at the end of this document offers a summary.

- **Measuring our impact:**

It's crucial that we understand the impact of our work on pets and their people. So, last year we embarked upon a project to develop our Theory of Change and Impact, Evaluation and Monitoring programme. This ongoing project will result in a better approach to reviewing our work and directing resources to those services that are making the most significant difference.

- **Snowden Cat Care Centre:**

Our fantastic new 60-unit Cat Care Centre opened its doors in February 2022, increasing our on-site capacity for cats by 50%. This bespoke, state-of-the-art facility provides a high-quality environment for cats that we can be proud of. We are already seeing the difference this is making to the cats in our care whilst they await a new home.

- **Small pets accommodation refurbishment:**

We refurbished several of our small pet accommodation areas to provide improved levels of care and comfort. This work has also increased our capacity to offer more help to the hundreds of small pets in need of relinquishment and rehoming every year. Plans are underway for a full redevelopment of all our small pet facilities, with the aspiration of matching the quality of our new Cat Care Centre.

- **Ezyvet:**

We introduced a new veterinary management system which has greatly improved the efficiency of our Veterinary team. With easier processes that help with note taking, recording, appointment scheduling, and dispensing of treatments, the new system has freed up valuable time for our vets and nurses. This means they can focus on providing hands-on care and treatment to our pets.

- **Pet Central, our new pet and customer management system:**

We have been working hard over the last year with users to find out what we need from a new pet and customer management system. This resulted in over 500 individual requirements that have been evaluated and prioritised for implementation over several phases. Our current system is 11 years old and hasn't been able to keep up with the

breadth of services that Woodgreen now provides for pets and people. We have been working with a supplier to build the new system in Microsoft Dynamics, which will give us a flexible platform that can adapt to changing requirements. It will make processes more efficient and help teams with cutting down on administrative work, leaving them more time to support pets. We aim to start using the new system in November 2022, then following a period of getting familiar with it, we will add a further suite of enhancements, which we aim to complete by March 2023.

• The Adoption Mission:

At Woodgreen, we are passionate about sharing our knowledge and experience as widely as possible. The more we can do this, the more it will benefit pets and their people. We also thrive on continuing to learn from pets and owners or carers who we interact with daily. So, we were thrilled to have the opportunity to start working with Mars Petcare on a new initiative called The Adoption Mission. This

initiative includes a website dedicated to training staff and volunteers at charities within the Association of Dogs and Cats Homes (ADCH). We have added our dog related behaviour, training and welfare content to The Adoption Mission website for all members to access. Alongside this, we will be giving up to two free 1-2-1 advice sessions to each charity, which they can use for dogs in their care or gift to an owner of a dog they rehome. We will also be holding quarterly live online Q&A sessions, which all charity staff and volunteers who have signed up to The Adoption Mission can attend.

• Dog relinquishment research:

In September 2021, Woodgreen's research officer, Natalie Powdrill-Wells, and collaborators from Hartpury University, Vicky Melfi and Sienna Taylor published a research paper titled, "Reducing Dog Relinquishment to Rescue Centres Due to Behaviour Problems: Identifying Cases to Target with an Advice Intervention at the Point of Relinquishment Request". This paper offers an insight into alternatives to companion dog relinquishment such as seeking behaviour advice first from organisations such as ours. If more owners are willing to do this, there is real potential to keep more dogs with their families and avoid the stress and heartache involved for both parties. It is our hope that sharing the findings will encourage other animal welfare organisations to consider alternative ways to help more pets and people live better lives together. We're really looking forward to taking this area of research further and learning more about the impact of various interventions like the one outlined above.

• New pet seeker journey and advice platform on the website:

We've improved the experience for people thinking about getting a rescue pet on our website. Online visitors can now see most pets we have in need of a new home. They can also express their interest in an individual pet or ask our team to match them to a pet. The new pages give a lot more information about the pet, including pictures, videos, training and medical requirements, home environment needs and a description of their personality. We will continue to gather feedback from users to inform improvements.

Our new look advice pages give pet owners, or those considering getting a pet, free access to expert advice developed by our in-house teams. They now have an improved search facility too, along with clearer access to online workshops across the species. The site provides a one stop shop for all pet advice and support needs.

Working together to support pets and their people:

To reach more pets and have an even bigger impact, it is important for us to work in collaboration with other like-minded organisations on issues relating to animal welfare. **This year we have continued to actively work as members of the following groups:**

- Canine and Feline Sector Group
- Pet Advertising Advisory Group (PAAG)
- The Cat Group
- CatKind
- Dogs Die in Hot Cars (Weather)
- Rabbit Action Awareness Group and Rabbit Awareness Week
- Animal Welfare Education Alliance

Dinky's story

Five-year-old Dinky came to Woodgreen in November 2020 because her owner, sadly, couldn't look after her anymore. This sensitive soul didn't cope well on her own – she had a serious case of separation anxiety. Woodgreen created a plan to get Dinky's life back on track, but her journey with us wasn't plain sailing. After finding Dinky a new home and giving her owners' weekly advice on home alone training, it wasn't long before she had to come back to us. Dinky's new owners weren't able to dedicate time to her training because of work commitments. She continued to be very clingy and would tremble if one of her owners left her alone in a room, so they

couldn't go anywhere without her. While we searched for a new match, Dinky benefitted hugely from spending time in the home of dedicated Woodgreen fosterer Charlotte. As well as offering some extra comfort, she helped Dinky with separation anxiety training. Charlotte split this up into tiny steps, and it was a slow but steady process. From leaving a treat when exiting the room to breaking down their 'going out' routine, her efforts eventually began to pay off. Dinky started to relax and eventually she could be left alone with toys and treats for ten minutes – a big improvement!

After 296 days since first coming into our care, we were so pleased to find Dinky a new owner, Kayleigh, who told us:

"You can tell she's been loved every step of the way."

Looking to the future

Now that we've defined our vision through the development of our Pet Services Strategy, we are looking forward to delivering even more positive outcomes for pets and their people throughout 2022/23.

Our work over the next 12 months will see us working towards the following:

1. Identify

We will work with the community to proactively identify pets that are vulnerable, or at risk of becoming vulnerable, so they can receive appropriate support.

If we do this well, we will see:

- Pet owners who are struggling are identified and supported.
- Vulnerable pets and owners are effectively identified by Woodgreen.
- Increased presence of Woodgreen in local communities in a non-fundraising capacity.

2. Support

We will focus and reshape our resources so that we can directly support as many pets in need as possible.

If we do this well, we will see:

- Enhanced volume and welfare of pets supported by Woodgreen.
- Increased number and proportion of successful 'rehomings'.
- Increased awareness among the public of the ways we can support.
- Owners accept help and feel supported to make decisions.
- Owners take and sustain recommended actions to improve their pet's welfare.

3. Prevent

We will provide support at the acquisition stage and in the early days of the pet ownership journey so that we can help create brighter futures for pets and their people.

If we do this well, we will see:

- Potential pet owners know where to go for help/support.
- More potential pet owners get good quality advice and support before making their decision.
- Increased awareness that certain channels of pet acquisition can be problematic for pet welfare.
- People have a better understanding of what to expect as a new pet owner.
- Owners are better able to recognise a problem or a need.

4. Share

We will share our learnings about the unique needs of pets to engage, inform and influence wider society to understand and act for positive pet practice.

If we do this well, we will see:

- Increased recognition of pet care as an issue across society.
- Increased public understanding of the five welfare needs and good pet wellbeing.
- An improved understanding across the sector and wider public of the most pressing pet care issues.

Environment

Woodgreen has always taken a proactive approach to reducing its impact on the environment in many ways. For example, there is a wind turbine at the Godmanchester Centre that generated 1.7m kwh of electricity, with 1.0m kwh exported to the national grid. Photovoltaic panels generate a further 8,000 kwh of electricity annually.

Actions taken at our main Godmanchester Centre during the reporting period include continuing the installation of LED lighting with movement detectors, as well as

completing an upgrade to the wind turbine to improve its efficiency.

Plans for next year include carrying out a further review under the Energy Savings Opportunity Scheme 3, replacing our petrol /hybrid owned small vehicles with a fully electric vehicle fleet, and putting in place an Environmental Sustainability Policy.

In line with the requirements for Streamlined Energy and Carbon Reporting, we have analysed our organisation wide energy usage, and these are summarised as follows:

Energy type	tCO2e	
	2022	2021
Electricity imported from the national grid	156.34	124.95
Natural gas imported from the gas network	0.31	2.02
Liquid petroleum gas (propane)	56.15	45.61
Fuel used for owned vehicles	51.04	26.54
Fuel claimed for business mileage	21.90	21.00
Total	285.74	220.12

This analysis is based on usage stated in source documentation and has been converted into tCO2e using the UK Government GHG Conversion Factors for Company Reporting (2021).

UK energy usage covers all of our charitable activities and support activities carried out at our main site in Godmanchester and our retail network of 22 charity shops. Total emissions of 285.74 tCO2e equates to 1.03 tCO2e (2021: 0.89) per full-time equivalent employee. The increase in energy consumption between the two years is reflective of the charity increasing activity levels as Covid-19 restrictions were eased.

In addition to the above, Woodgreen used 700,000 kwh of electricity generated from its wind turbine and solar panels. This is the equivalent of 149 tCO2e of emissions that otherwise would have been created had that power been drawn from the National Grid.

Financial Review

Income

Woodgreen's total income in the year was £17.1m (2021: £12.8m). This increase was due to an increase in legacy income to £7.4m (2021: £4.5m), and higher donations of £5.8m (2021: £5.2m). We also saw charity shop trading income rise to £2.6m (2021: £0.7m) following the exit from the Covid-19 lockdown measures imposed in the prior year. Despite the increase in legacy income, we are aware that there are still delays in the Probate system and with HMRC approving final estate accounts.

Income from charitable activities is largely from animal rehoming fees, and the relaxation of Covid-19 restrictions meant this source of income saw an increase of 23% to £0.2m.

Expenditure

Total expenditure increased by 17.5% to £18.1m (2021: £15.4m). The increase was due to resumption of activity levels reflective of the relaxation of Covid-19 restrictions, which affected all costs across the charity. Other trading costs increased to £3.0m from £2.3m due to the reopening of the charity shops. Expenditure on our charitable work was £7.1m (2021: £7.0m), which was less than budgeted due to a difficulty recruiting and retaining staff.

Net position

Net income after investment gains shows a deficit of £0.9m (2021: deficit £1.0m), which is £1.3m worse than the budgeted surplus of £0.4m. This is largely due to the delay in the sale of the two sites that were closed in prior years. Investment gains in the year were £0.2m (2021: gain of £2.6m) due to the financial market's reaction following economic shocks caused by high global inflation and the war in Ukraine.

This year's result means that total year end funds reduced by 3.7% to £23.3m, of which £0.1m were restricted (2021: £0.85m).

Fixed assets

Fixed assets are held to achieve the objects of the charity. Movements in fixed assets during the year are set out in notes 9 and 10 of the financial statements. Tangible fixed asset additions include the new Cat Care Centre at Godmanchester that was completed in February 2022 at a cost of circa £2.4m. Intangible work in progress relates to the new pet management information system that will be completed later in 2022.

Woodgreen's founding site at 601 Lordship Lane, London was closed in March 2020 and the site at Heydon was closed in March 2021. Both were marketed for sale during the year. The London site has been sold on a "subject to planning" basis and therefore no sale proceeds have been recognised. The site at Heydon is still being marketed.

In October 2017 Bidwells performed a desktop valuation of the charity's freehold land and buildings on an 'existing use' basis. The valuations of our Godmanchester, London and Heydon centres are not being adopted by the charity; the Council is of the opinion that the 'existing use' valuations of the sites do not give a true and fair reflection of their value to the Charity. Their inclusion at depreciated historic cost is considered a more appropriate basis, as stated in note 9 of the accounts.

Investments

The charity held listed investments totalling £13.5m (including working capital) at the end of the year (2021: £13.2m). The investments are all held in a medium-high risk total return portfolio. The portfolio is long-term in nature and is held to generate both income and capital growth. The portfolio is managed by Charles Stanley on our behalf on a discretionary basis, subject to a risk profile and asset allocation agreed by the Trustees. JTFM Investment Consulting continue to act as our independent investment advisers, reviewing the performance of our investment managers.

Performance of the growth portfolio is measured against the MSCI Private Investor Balanced Total Return Index. This benchmark for the asset allocation has been consistently exceeded by our investment managers in the five years until March 2021. However, during 2021/22 the benchmark total return was 7.8% against our portfolio growth of 2.6%. The underperformance is partly due to the impact of our ethical investment policy that means we are unable to invest in the oil sector. This has been responsible for reducing gains in the second half of the year. Our investment policy targets a rolling five-year return of inflation (as measured by CPI) plus 3%. As at March 2022, the five-year return on the growth portfolio was 50.5% against the target of 30.4%.

As at 31 March the total portfolio was split as follows:

	2022 £000	2021 £000
Listed equity investments	8,688	9,461
Fixed and variable interest bonds and gilts	1,820	2,949
Other	2,075	569
Cash	952	235
Total listed investments	13,535	13,214

Woodgreen has an ethical investment policy which states that it does not invest, directly or indirectly, in companies that carry out animal testing for non-medical purposes. This includes organisations involved in any aspect of the fur trade.

Reserves

As a charity we rely on a number of income streams including donations, legacy gifts, trading profits and investment income and gains. Legacy gifts and investment income and gains, in particular, are subject to large in-year fluctuations as can be seen when looking at the 2022 results compared to 2021. However, there will always be pets in need of our rehoming services and people who need our advice and education services. As a charity we are committed to providing a comprehensive ongoing service for them. To do this we need to maintain a level of reserves in case there is a short-term fall in income or an exceptional rise in costs.

The Trustees have set a policy that requires 6-9 months of budgeted expenditure in free reserves. Free reserves are deemed to be the unrestricted funds remaining after accounting for our designated funds for fixed assets (£7.6m) and the revaluation reserve (£3.3m) – see note 16 of the accounts. As at 31 March 2022 the level of free reserves stood at £12.3m (2021: £12.8m) and represent 7.2 months' of 2023 budgeted expenditure.

Restricted income is that which is given with a specific purpose and these are detailed in note 16. The balances remaining on restricted reserves at 31 March 2022 only amounted to £0.1m.

Going concern considerations

The Trustees have carried out a going concern review. They have concluded there are no material uncertainties that may cast significant doubt on our ability to continue to adopt the going concern basis of accounting for at least twelve months from the date when the financial statements are authorised for issue.

In carrying out the review, the Trustees considered the financial impact of the key risks facing the charity. A reduction in individual giving and a fall in legacy income are likely to have the highest short-term impact. The worst-case scenario would see this reduction alongside a fall in the value of our investment portfolio, which is where our unrestricted free reserves are invested. Stress testing shows that our reserves will be sufficient even if we see a 50% reduction in individual giving and legacy income combined with a 25% drop in the value of our investments.

Our approved budget for next year shows budgeted deficits of £0.7m in the year to March 2023 and £1.4m in the year to March 2024.

The budgeted impact on reserves would result in unrestricted free reserves of £12.4m at March 2023 and £11.5m at March 2024. Both of these figures are within our target range of 6-9 months of budgeted expenditure. Most of our reserves are held within our investment portfolio, which are forecast to total £14.2m at March 2023 and £14.3m at March 2024.

The value of our fixed assets has also been reviewed. However, given that our operations are fully functional, there is no reason to reduce the carrying value or remaining life of any individual asset or category of assets.

Principal risks and uncertainties

The trustee body (Council) is responsible for ensuring that effective risk management and internal control systems are in place to manage the charity’s exposure to major risks. These include fraud and other irregularities. We operate a risk management framework designed to mitigate, though not to eliminate, major risks. It also provides reasonable, though not absolute, assurance against material errors or loss.

The charity has a comprehensive annual business planning and budgeting process. This process and the annual budget is approved by the Council. Performance is then monitored and reported on during the year in reports to the Finance and Risk Committee and Council. Major public, employer and property liabilities are fully insured. The Charity has risk management policies in place to identify risks arising from the external environment and existing operations.

Risks are assessed according to the potential strategic impact on the charity and their likelihood of occurrence. Controls are in place and are constantly reviewed and updated to manage these risks. The most recent update was approved by Trustees in June 2022.

The principal risks facing the charity’s objectives are summarised below, along with the main mitigating actions in place.

Principal risks	Risk management
<p>Raising funds</p> <p>Negative economic impact results in a sustained reduction in cash and regular donations. (HIGH)</p> <p>Legacy income is forecast to fall at least 20% below budgeted levels for the next two years, leading to the inability of the charity to implement its strategy. (MEDIUM)</p>	<p>Diverse fundraising base with investment to grow multiple channels. Strategy based on recruiting regular givers to improve sustainability of income. Significant investment and activity to drive legacy marketing. Invest in digital fundraising platform and function, as well as commercialisation.</p> <p>Regular monitoring of current performance, pipeline, and general legacy trends. Active marketing to prospective legators through increased activity and better use of data. Keeping products, such as Pet Promise, refreshed. Ability to switch resources to other fundraising channels.</p>

Principal risks	Risk management
<p>Reputation</p> <p>An incident, activity, decision, or event, resulting in an allegation against Woodgreen or the sector, whether true or false, that causes reputational damage to the charity. (HIGH)</p> <p>Inability of the Trustees to hold the Leadership team accountable to develop, deliver and adapt corporate strategies and operating plans, leading to a stagnating and less impactful organisation. (MEDIUM)</p> <p>Serious safeguarding issue affecting a customer or supporter resulting from action by a Woodgreen employee or volunteer leading to reputational damage to the charity. (MEDIUM)</p>	<p>Staff briefed to report potential issues to line manager and/or Comms team, with the Comms team providing a reactionary response. Comms team also use media (social and print) monitoring agency and YouGov to monitor reputation, both instantaneously and over time. Policies are in place to deal with potentially controversial issues.</p> <p>Trustee sub-committees consisting of subject matter experts. Regular reporting to Trustees on strategic matters and the development of new strategic approaches and associated operational plans. Regular reviews of performance. Ongoing training and information provision to Trustees on their legal and sector role and responsibilities.</p> <p>Fundraising Vulnerable Persons Policy. Public Interest Disclosure Procedure in the Staff Handbook for reporting. Mental health training to spot safeguarding issues internally and externally. Lone worker policies and procedures. Customers and supporters can access our complaints process to report concerns. Whistleblowing Policy. Referencing and DBS policy. Mandatory Safeguarding eLearning training with compliance checks.</p>

Principal risks	Risk management
<p>Business interruption The inability to retain or recruit staff of the right calibre and/or maintain morale, which impacts the performance of the organisation and its capacity to deliver its strategic priorities. (HIGH)</p>	<p>Policies and procedures are in place to ensure pay equity. Investment has been made in hiring systems, discipline specific job boards and a suitably qualified and experienced talent team to facilitate in-house search and recruitment. The People team is continuously monitoring labour turnover for insight to spot trends and put actions in place. We are creating a positive organisational culture through the development of our Ways of Working. Biennial engagement surveys are in place for staff feedback and temperature checks on morale. Clear Review system introduced to improve performance management and engagement.</p>
<p>Theft, destruction, or corruption of customer and/or supporter data. The consequences could include reputational damage, inability to contact supporters/customers, and inability to collect payments. (MEDIUM)</p>	<p>Data transfers adhere to industry security standards. Only relevant recognised users have access to data. Platforms such as Sharepoint have security of which only the named person has access, and this access cannot be transferred. Data is destroyed/ deleted once it has been used for the temporary purpose. IT security measures restrict external attacks and penetration testing is done regularly. The Data Governance Assurance Framework now has no significant data risks not addressed.</p>
<p>Regional or national disease epidemic negatively affects the accessibility and delivery of pet services. (MEDIUM)</p>	<p>Business Continuity Plans and Incident Management processes are well established and have been fully tested. Many staff can work from home as all systems are accessible remotely; healthy pets can be housed with fosterers; the majority of the animal rehoming journey can be carried out remotely. Site development plans continue to recognise importance of ability to isolate sections or areas.</p>

Principal risks	Risk management
<p>Financial Serious financial fraud is carried out against the charity. (MEDIUM)</p>	<p>Procurement procedures; dual payment authorisation; rigorous bank detail change controls; strong internet banking security; continuous training on cyber threats; segregation of duties; and regular reconciliations. Cyber crime insurance is in place. Cyber Security training is now a compulsory training course for all staff.</p>

People

Woodgreen's people are our most valuable asset. We rely on their skills, experience, and knowledge to deliver the charity's mission to improve pet's and people's lives. We could not do what we do without the dedication of our 312 employees. Our volunteers also play a crucial role through the time they give in our retail shops and frontline services, as well as fundraising and supporting us in other ways. In 2021/22 we had the support of 865 people who chose to volunteer, giving us 245,790 hours in donated time. Throughout this period the Covid-19 pandemic continued to impact our colleagues and cause disruption to our normal ways of working. We continued to provide as much support as possible, facilitating hybrid working where the role allows, embracing digital technology and improving our policies, processes and systems. Whatever it took to make things faster and simpler for our colleagues and ensure we all remain connected.

Diversity and inclusion underpin our 'One Team' core value. We comply with the Equality Act 2010, ensuring an inclusive working environment free of discrimination at all stages of the employment life cycle, and we continually review for bias within our policies and practices across the organisation. We have zero tolerance for behaviour, attitudes and language which may be deemed to be offensive, derogatory or discriminatory, ensuring it is not overlooked but challenged, with the aim of effecting change or redress.

Being a diverse and inclusive employer is so important to us. We are able to record, track and report the protected characteristics of our employees and candidates, specifically in relation to their age, gender, race, ethnicity, nationality, faith, sexual identification and gender reassignment. The insights gained will inform our equality,

diversity and inclusion plan to embed EDI in our culture. Involving and consulting our staff on significant organisational initiatives is done through our Staff Forum. Each Staff Forum member represents a number of constituent colleagues to ensure that everyone has an opportunity to be kept informed and listened to. We also have a person dedicated to internal communication that allows staff and volunteers to be kept updated with the day-to-day activities of Woodgreen as well as longer-term strategic developments and organisational performance.

We have not been immune to “the great resignation”, the ongoing global phenomenon that describes record numbers of people leaving their jobs after the pandemic triggered a shift in their priorities. In this financial year 71 staff voluntarily resigned from their job, an increase of 97% from 2020/21 (36). During this period, we recruited into 106 positions and supported these new hires

with the introduction of a new digital onboarding process.

Consequently, employee retention and morale is the most significant risk on the corporate risk register, and we took a number of actions in this period to mitigate this. The Remuneration Committee’s remit and terms of reference was reviewed and changed to incorporate wider people matters. In addition to the overarching principles, parameters and affordability of the Remuneration Policy, the purpose of the renamed “People Resource Committee” is to consider, oversee and evaluate the appropriateness of our People Strategy. This includes providing necessary challenges on the strength and effectiveness of our plans, policies and frameworks. All of these enable us to attract, motivate and retain an inclusive and diverse selection of directors, staff and volunteers. They also ensure we have the right skills, expertise, structures and conditions in place to enable the charity to achieve its strategic aims. Therefore, any feedback on these plans is very important to us.

As the cost of living increased, fuelled further by the impact of events in Ukraine, we were pleased to be able to give staff an ad hoc pay award of circa 2% in October 2021. In addition, we provided staff with a non-consolidated bonus in March 2022, ahead of the annual pay award of 3% on 1 April 2022. We were also delighted that the work we had undertaken the previous year on job evaluation and introducing new pay bands was reflected in our 2021 gender pay gap. In 2021 the median gender pay gap reduced to 0.6% – the lowest it’s ever been at Woodgreen – compared to 6.7% last year and 11.2% in 2019. This is below organisations in the same sector (charities/ not-for-profit: 2.2%) and considerably below the UK national average of 15%.

Learning and development for our people was expanded. We introduced our new first-line management programme “Leading with Pride” and strategic development programmes for directors and senior leaders. Digital technology was utilised to deliver these when we were not able to meet face to face. Last year, we trained 132 employees and managers and a further 42 e-learning courses were completed by 511 staff and volunteers.

Our plans for 2022/23 continue to focus on the retention and wellbeing of our staff and volunteers through:

- The introduction of a continuous performance review process, enabling people to be rewarded for their contribution to the charity.
- Focusing on developing wellbeing programmes and benefits that enhance the employee experience and increase engagement.
- The introduction of a Resolution Framework which replaces traditional discipline and grievance procedures. This will identify the most appropriate route to resolution in each case.
- The recruitment of a new head of volunteer engagement to implement new systems and processes which will support volunteers and volunteer leads, as well as enhance the volunteer experience at Woodgreen.

Fundraising and our supporters

The last year has been truly exceptional for fundraising and we are, as ever, indebted to the generous and unwavering support provided by our donors and volunteers. They've helped Woodgreen raise £15.8m of voluntary income, with gifts from donations and legacies of £13.1m, up more than £3.4m or 35% on the previous year, and the best in the charity's history.

Income from both legacy gifts and fundraising donations exceeded expectations and it is clear the work Woodgreen undertakes for pets and their people is deeply important to long-standing and new supporters alike.

Legacy income rebounded from a challenging year in 2020/21. During this period we experienced issues with external administration, from the granting of probate through to tax assessments and processing, which impacted the number of gifts Woodgreen received. The backlog that developed, affecting us and the wider sector, is slowly being resolved. We have seen income and notifications for new gifts rising steadily as a result.

The total value of gifts from bequests was more than £7.3m for the year and we expect this figure to rise again in the coming years. This reflects trends in the sector and is underpinned by our recent investment in legacy marketing. The importance of this can't be overestimated – it ensures everyone we speak to understands the incredible difference a legacy gift can make to pets and people.

Nothing demonstrates the generosity and impact such gifts can have more than the opening of the Snowden Cat Care Centre this year (see page 26).

The centre was largely funded by a generous legacy from Sheila Snowden in 2019 and we were delighted to welcome members of the Snowden family to visit the new Cat Care Centre. It was a pleasure to show them the incredible facilities we now have to care for cats and kittens in need.

We have and continue to invest in growing our fundraising. These funds enable us to make the biggest impact we can – being there for every pet and owner who needs us. This is a carefully considered strategy, recognising that investment in fundraising must be balanced against directing funds to charitable activities. However, as we continue to focus on transforming our existing pet services, now is the right time to create greater scope within our fundraising for the years ahead.

This investment is bringing excellent returns with donations growing from 5.2m (2020/21) to £5.8m (2021/22) – up 10%. Building on incredible support during the pandemic, our appeals continue to exceed expectations. The number of regular givers – so important for financial planning and sustainability at Woodgreen – continues to grow. In addition, the number of people choosing to support us with a Direct Debit increased over the year from 29,164 to 37,089.

Across all our fundraising we've had the opportunity to talk to members of the public about the work we do and the difference they can help make. At a time when the financial pressures on individuals and households across the UK are so acute, it is humbling that so many people continue to commit to supporting us with gifts large and small. Their generosity is unstinting and highlights a shared commitment to do whatever it takes to ensure pets and pet owners have the support they need. And to ensure pets are healthy, well cared for and in happy homes for life.

Raising money for Woodgreen

We receive no government funding and everything we do is possible only through the generosity of our incredible supporters and volunteers. We recognise that, now more than ever, people rightly expect that we fundraise in an open and honest, clear and respectful way.

They passionately raise awareness about the work we do and – most importantly – share stories of the many pets who so desperately need our care and support.

We have careful safeguards to protect people in vulnerable circumstances, and we ensure these are followed through rigorous training, mystery shopping and other monitoring. In 2021/22, we received 93 complaints, very slightly down on the previous year. We continue to review and consider every complaint individually, and we use this insight to adapt, develop and strengthen our policies and procedures. Ultimately, these efforts help improve our fundraising.

We continue to work with carefully chosen agencies to deliver our fundraising, recognising that this is the most cost-effective option and enables us to reduce risk to the organisation. An important part of this is working closely with the staff of these agencies, as we recognise they are often our representatives out in the community. We are heartened by the many important conversations they have with members of the public.

Our fundraising and retail activities are regularly reviewed by the Council of Trustees and Senior Leadership team. We are members of the Fundraising Regulator and abide carefully by the Codes of Fundraising Practice. Supporting a charity like Woodgreen is a matter of choice, driven by a deep care for the work, impact and difference that a gift can have. We recognise the obligation this has on us, and we will continue to do everything we can to reflect the generosity that is shown towards the charity. Above all, we will ensure the support we receive is used in the best way to have the biggest possible impact on pets and their people.

This is the end of the Strategic Report.

Our charity shops

After losing more than 7 months trading to the pandemic in 2020/21, we were able to reopen in April 2021 and slowly return to normal business. Our incredible shop teams – with the support of over 600 volunteers – worked tirelessly to meet the public’s enthusiastic return to the high street. Retail income rose to £2.8m, with a net profit for the year of £532,000 (2020/21: £70,000 loss), far ahead of our expectations.

We continued to expand our retail network, with new shops opening in Sudbury and Huntingdon. This work continues as we look for other sites

across the region to generate additional income and awareness of Woodgreen. There is no single more important ingredient in our retail success than that provided by our volunteers. Over 600 incredible people, contributing their time and efforts to sort donated stock, help customers and process sales, gave over 135,000 hours, with a value of £1.4m. Anyone who has visited our shops will know how these volunteers perfectly represent Woodgreen, how caring and considerate they are and how dedicated they are to supporting our cause. We simply cannot thank them enough.

Governance

Legal structure

Woodgreen is a charitable company limited by guarantee. The Articles of Association set out the charity's objects and powers and is its Governing Document. The charity is governed by its Council of Management which consists of the Trustees as stated below and meets regularly throughout the year. As elected members the Trustees are subject to fixed terms of office. Decisions are taken by majority vote.

The charity has a 100% interest in its trading subsidiary, Wood Green Enterprises Limited, which runs non-charitable trading operations such as the sale of new goods in our charity shops and wind turbine electricity generation. Profits of the subsidiary are gifted to the charity in accordance with a deed of covenant.

As at 31 March 2022, the Council had the following committees which met during the year to advise on specific aspects of Woodgreen operations:

Pet Services – which reviews animal welfare and education policies and projects, while also supporting their implementation.

People Resource – which oversees the remuneration policy of the charity and recommends major changes to employee remuneration and benefits to Council.

Finance and Risk – which oversees all financial aspects of the charity including reviewing budgets, performance against budget, risk management, trustee report and accounts as well as setting and reviewing investment policy and performance.

Appointment and induction of Trustees

Trustee recruitment and appointment takes place through a Trustee Search Committee that meets as required. This committee identifies the skills and experience likely to be of value to the charity and finds people with such skills who may wish to become Trustees or serve as a director of the charity's trading subsidiary. An induction programme is offered to all new Trustees and further updates and training are provided as required. This includes visits to Woodgreen operations, meetings with the chief executive, members of the Senior Leadership team and other senior managers as appropriate.

Charity governance code

Woodgreen recognises that good governance is fundamental to our success in delivering for pets and their people.

During the year, we have developed our Theory of Change to enable us to prioritise and plan our activities in a way that maximises our impact. This in turn is being used to create our Pet Services Strategy, which was outlined earlier. Trustees have been involved in this journey and as a result we will be developing our governance reporting content to ensure that progress is monitored at every council meeting.

Risk management is taken very seriously by Trustees, and they carry out biannual reviews of the risks facing the charity and ensure that appropriate mitigations are put in place. As discussed earlier, we have recognised that recruitment and retention is the key risk facing Woodgreen. This is being closely monitored by Trustees, particularly by the People Resources sub-committee.

Also, this year we have developed our organisational values that we call our "Ways of Working". Adherence to these values is critical for Woodgreen's success and all Trustees have formally signed up to them to demonstrate leadership from the top.

Beyond "Ways of Working", we also need to demonstrate our commitment to animal welfare, which is inherent to our mission.

In June 2021, we reaffirmed our commitment to ban all investment holdings in companies that carry out non-medical animal testing as well as all companies linked to the fur trade.

Trustees have recognised there are some skill gaps in the current board make-up as well as a lack of diversity. As a result, we are actively looking to recruit a number of new Trustees during the next financial year.

Finally, recognising the strategic importance of volunteering to Woodgreen, we have established a volunteer governance board with the full support of Trustees. This will ensure that we have a clear relationship with our volunteers and will include the creation of a Volunteers Charter.

Public Benefit

Charity Trustees have a duty to ensure that the charity's work meets public benefit requirements and to report on this in their Annual Report. The many activities undertaken by Woodgreen are summarised in this report and Trustees have given careful consideration to the Charity Commission guidance on public benefit in their decision making.

We believe that our work provides considerable public benefit by:

- Rescuing at risk pets and placing them in loving homes for life.
- Educating and enabling the public to better care for pets.
- Ensuring that we fully comply with the Animal Welfare Act for pets in our care.
- Offering volunteering opportunities for those who wish to support our work.

Our work in supporting pets in need through care, rehoming and educating the public about responsible ownership, provides a benefit to society as a whole. Through our services, we support people who are concerned about their pet's welfare, whilst also improving the lives of the pets we rescue.

Policies and decision making

The Council, assisted by the chief executive and the Senior Leadership team, is responsible for formulating the strategy and policies of the charity as a whole. This includes the approval of budgets and exercising financial control through regular financial reporting.

The Council acts on advice and information from regular meetings with its professional advisors as required. It also retains a number of professional advisors in conjunction with the operation of the charity. The advisors currently appointed are listed in this report.

The Council continually monitors the charity's performance throughout the year including measurement against key performance indicators.

Trustee responsibility statement

The Trustees (who are also directors of Wood Green Animal Shelters for the purposes of company law) are responsible for preparing the Trustees' Annual Report and the financial statements in accordance with applicable law and United Kingdom Accounting Standards (United Kingdom Generally Accepted Accounting Practice) including FRS102.

Company and Charity law requires the Trustees to prepare financial statements for each financial year, which give a true and fair view of the state of affairs of the charitable company and of the incoming resources and application of resources of the charitable company for that period. In preparing these financial statements, the Trustees are required to:

- select suitable accounting policies and then apply them consistently;
- observe the methods and principles in the charities SORP 2015 (FRS 102)
- make judgments and estimates that are reasonable and prudent;
- state whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the charitable company will continue in operation.

The Trustees are responsible for keeping adequate and proper accounting records that disclose with reasonable accuracy at any time the financial position of the charitable company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the charitable company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

In so far as each of the Trustees are aware there is no relevant audit information of which the Charity's auditor is unaware. Each of the Trustees has taken all the steps that they ought to have taken as Trustees to make themselves aware of any relevant audit information and to establish that the Charity's auditor is aware of that information.

Auditors

Crowe U.K. LLP were appointed by the Trustees as the Charity's auditors on 7 December 2017.

The Trustees' Report and Strategic Report were approved by the Trustees in their capacity as Directors of the company on 17 September 2022 and are signed on their behalf by

Dr Steven Carden, Chairman

Independent auditors' report to the members of Wood Green Animal Shelters

Opinion

We have audited the financial statements of Wood Green Animal Shelters ('the charitable company') and its subsidiaries ('the group') for the year ended 31 March 2022 which comprise the Consolidated Statement of Financial Activities (incorporating an Income and Expenditure Account), the Group and Charity Balance Sheets, the Consolidated Cash Flow Statement and notes to the financial statements, including significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, including Financial Reporting Standard 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland (United Kingdom Generally Accepted Accounting Practice).

In our opinion the financial statements:

- give a true and fair view of the state of the group's and the charitable company's affairs as at 31 March 2022 and of the group's income and expenditure, for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the group in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the trustees' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the charitable company's or the group's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the trustees with respect to going concern are described in the relevant sections of this report.

Other information

The trustees are responsible for the other information contained within the annual report. The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by the Companies Act 2006

In our opinion based on the work undertaken in the course of our audit:

- the information given in the trustees' report, which includes the directors' report and the strategic report prepared for the purposes of company law, for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the strategic report and the directors' report included within the trustees' report have been prepared in accordance with applicable legal requirements.

Matters on which we are required to report by exception

In light of the knowledge and understanding of the group and charitable company and their environment obtained in the course of the audit, we have not identified material misstatements in the strategic report or the directors' report included within the trustees' report.

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate and proper accounting records have not been kept or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of trustees' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

Responsibilities of Trustees

As explained more fully in the trustees' responsibilities statement set out on page 54, the trustees (who are also the directors of the charitable company for the purposes of company law) are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the trustees determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the trustees are responsible for assessing the charitable company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the trustees either intend to liquidate the charitable company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Details of the extent to which the audit was considered capable of detecting irregularities, including fraud and non-compliance with laws and regulations are set out below.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Extent to which the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We identified and assessed the risks of material misstatement of the financial statements from irregularities, whether due to fraud or error, and discussed these between our audit team members. We then designed and performed audit procedures responsive to those risks, including obtaining audit evidence sufficient and appropriate to provide a basis for our opinion.

We obtained an understanding of the legal and regulatory frameworks within which the charitable company and group operates, focusing on those laws and regulations that have a direct effect on the determination of material amounts and disclosures in the financial statements. The laws and regulations we considered in this context were the Companies Act 2006, the Charities Act and taxation legislation together with the Charities SORP (FRS 102). We assessed the required compliance with these laws and regulations as part of our audit procedures on the related financial statement items.

In addition, we considered provisions of other laws and regulations that do not have a direct effect on the financial statements but compliance with which might be fundamental to the charitable company's and the group's ability to operate or to avoid a material penalty. We also considered the opportunities and incentives that may exist within the charitable company and the group for fraud. The laws and regulations we considered in this context for the UK operations were employment legislation, health and safety legislation, animal welfare regulations, fundraising regulations and General Data Protection Regulation (GDPR).

Auditing standards limit the required audit procedures to identify non-compliance with these laws and regulations to enquiry of the Trustees and other management and inspection of regulatory and legal correspondence, if any.

We identified the greatest risk of material impact on the financial statements from irregularities, including fraud, to be within the timing of recognition of legacy and other income and the override of controls by management, in particular the appropriateness of journal entries. Our audit procedures to respond to these risks included enquiries of management and the Finance & Risk Committee about their own identification and assessment of the risks of irregularities, sample testing on the posting of journals, reviewing accounting estimates for biases, reviewing regulatory correspondence with the Charity Commission, sample testing of legacy and other income and reading minutes of meetings of those charged with governance.

Owing to the inherent limitations of an audit, there is an unavoidable risk that we may not have detected some material misstatements in the financial statements, even though we have properly planned and performed our audit in accordance with auditing standards. For example, the further removed non-compliance with laws and regulations (irregularities) is from the events and transactions reflected in the financial statements, the less likely the inherently limited procedures required by auditing standards would identify it. In addition, as with any audit, there remained a higher risk of non-detection of irregularities, as these may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls. We are not responsible for preventing non-compliance and cannot be expected to detect non-compliance with all laws and regulations.

Use of our report

This report is made solely to the charitable company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the charitable company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the charitable company and the charitable company's members as a body, for our audit work, for this report, or for the opinions we have formed.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2022

1. Accounting Policies

1.1 Basis of preparation and consolidation

The financial statements have been prepared in accordance with Accounting and Reporting by Charities: Statement of Recommended Practice applicable to charities preparing their accounts in accordance with the Financial Reporting Standard applicable in the UK and Republic of Ireland (FRS 102) (effective 1 January 2015) - (Charities SORP (FRS 102)), the Financial Reporting Standard applicable in the UK and Republic of Ireland (FRS 102) and the Companies Act 2006.

1.2 Group financial statements and consolidation

The Charity meets the definition of a public benefit entity under FRS 102. Assets and liabilities are initially recognised at historical cost or transaction value unless otherwise stated in the relevant accounting policy notes.

The statement of financial activities (SOFA) and balance sheet consolidate the financial statements of the Charity and its subsidiary undertaking, Wood Green Enterprises Limited. The results of the subsidiary are consolidated on a line-by-line basis. No separate SOFA or cashflow statement has been presented for the parent charity alone as permitted by section 408 of the Companies Act 2006. All entities prepared financial statements to 31st March 2022.

1.3 Going concern

The charity's activities, together with factors likely to affect its future development, performance and financial position and commentary on its financial results and its cashflows, are set out in the Trustees' report and elsewhere in the financial statements. The Trustees have concluded that no matters have come to their attention that would prevent the charity from being able to maintain its current charitable activities and trade with customers and suppliers and they therefore consider that it is appropriate for the financial statements to be prepared on the going concern basis.

1.4 Legal status of the charity

Wood Green Animal Shelters is a company limited by guarantee (registered number 02073930), which is a public benefit entity and registered as a charity in England and Wales (charity number 298348) and domiciled in the UK. The members of the company are the Trustees named on page 53. In the event of the Charity being wound up, the liability in respect of the guarantee is limited to £1 per member of the Charity. The registered office is King's Bush Farm, London Road, Godmanchester, Huntingdon, PE29 2NH.

1.5 Fund accounting

General funds are unrestricted funds which are available for use at the discretion of the Trustees in furtherance of the general objectives of the charity and which have not been designated for other purposes.

Designated funds are unrestricted funds that have been set aside by the Trustees for particular purposes. The aim and use of each designated fund is set out in the notes to the financial statements.

Restricted funds are funds which are to be used in accordance with specific restrictions imposed by donors or which have been raised by the charity for particular purposes. The costs of raising and administering such funds are charged against the specific fund.

1.6 Income

Income is recognised when: i) the charity has entitlement to the funds; ii) any performance conditions attached to the items of income have been met; iii) it is probable that the income will be received; and iv) the amount can be measured reliably.

Donations

Donations are accounted for as received. In the event that a donation is subject to fulfilling performance conditions before the charity is entitled to the funds, the income is deferred until either those conditions are met in full, or their fulfilment is wholly within the control of the charity and it is probable that those conditions will be fulfilled in the reporting period. Income from Gift Aid tax reclaims is recognised for any donations with relevant Gift Aid certificates recognised in income for the year. Any amounts of Gift Aid not received by the year end are accounted for in income and accrued income in debtors.

Donated goods

Donated Goods are recognised as income when the charity has control over the item, any conditions associated with the donated item have been met, the receipt of economic benefit from the use by the charity is probable and that economic benefit can be measured reliably. In accordance with the Charities SORP (FRS102) volunteer time is not recognised; refer to the Trustees' report for more information about their contribution. On receipt, donated goods are recognised on the basis of the value of the gift to the charity which is the amount the charity would have been willing to pay to obtain services or facilities of equivalent economic benefit on the open market; a corresponding amount is recognised in expenditure when the service is utilised or the gift distributed.

Legacies

Woodgreen recognises residuary legacy income at the earlier of the date of receipt or when the executors have determined that a payment can be made following the agreement of the estate's accounts, or on notification by the executors that payment will be made. Pecuniary legacy income is recognised on receipt unless it is considered material (greater than 1% of total Woodgreen income) and there is non-contentious evidence of entitlement, value and probability of receipt, whereupon it is recognised in the same way as residuary legacy income. Life interest legacy income is recognised at the date of death of the life interest, provided the receipt and value criteria are met.

Trading activities

Income from trading activities includes income earned from activities to raise funds for the charity. Income is received in exchange for supplying goods and services in order to raise funds and is recognised when entitlement has occurred. Income received in advance for a future event is deferred until the criteria for income recognition has been met.

Government grants

Government grants are recognised on the performance model, when the Charity has complied with any conditions attaching to the grant and the grant will be received. The grant in connection to the coronavirus job retention scheme has been recognised in the period to which the underlying furloughed staff costs relate to.

Interest and dividends

Interest on funds held on deposit is included when receivable and the amount can be measured reliably by the charity: this is normally upon notification of the interest paid or payable by the bank. Dividends are recognised on ex-dividend dates when the charity has unconditional entitlement to the distribution. Income accrued and not received on these securities at 31 March is included in the market value of the investments held.

1.7 Expenditure and irrecoverable VAT

Expenditure is recognised once there is a legal or constructive obligation to make a payment to a third party, it is probable that settlement will be required and the amount of the obligation can be measured reliably. All expenditure is accounted for on an accruals basis. Input VAT incurred which cannot be reclaimed is included as a cost.

Where costs cannot be directly attributed to particular headings they have been allocated to activities on a basis consistent with use of the resources.

Costs of raising funds includes fees and charges for the management of the investment portfolio, fundraising costs and costs associated with trading activities.

1.8 Tangible fixed assets and depreciation

Fixed assets are included at depreciated historical cost. Individual fixed assets costing £1,000 or more are capitalised at cost.

Depreciation on tangible fixed assets is provided at rates calculated to write off the cost of fixed assets, less their estimated residual value, over their expected useful lives on the following basis:

- i) Freehold property – 2.5 to 4% per annum on a straight line basis;
- ii) Motor vehicles – 25% per annum on a straight line basis;
- iii) Wind turbine – 5% per annum on a straight line basis;
- iv) Fixtures & fittings – 10 to 20% per annum on a straight line basis; and
- v) Computer equipment – 33% per annum on a straight line basis.

Assets are reviewed for any indications of impairment at each balance sheet date. Assets under the course of construction are capitalised on practical completion.

1.9 Investments

Investments in subsidiaries are measured at cost less provision for impairment, if applicable.

Investments are a form of basic financial instrument and are initially recognised at their transaction value and subsequently measured at their fair value as at the balance sheet date using the mid-market quoted price (the difference between mid-market and bid price is deemed not to be material). The statement of financial activities includes the net gains and losses arising on revaluation and disposals throughout the year.

The Charity does not acquire put options, derivatives or other complex financial instruments.

The main form of financial risk faced by the charity is that of volatility in equity markets and investment markets due to wider economic conditions, the attitude of investors to investment risk, and changes in sentiment concerning equities and within particular sectors or sub sectors.

1.10 Investment properties

In accordance with FRS 102 investment properties are revalued. Revaluations are undertaken periodically based on open market values. These are revised in subsequent years by reference to published indices or comparative evidence and assessment of the circumstances of each property.

1.11 Stocks

Stocks are stated at the lower of cost and net realisable value, being the estimated selling price less costs to complete and sell. Cost is based on the cost of purchase on a first in, first out basis.

At each balance sheet date, stocks are assessed for impairment. If stock is impaired, the carrying amount is reduced to its selling price less costs to complete and sell. The impairment loss is recognised immediately in profit or loss.

1.12 Debtors

Trade and other debtors are recognised at the settlement amount due after any trade discount offered. Prepayments are valued at the amount prepaid net of any trade discounts due. Accrued income and tax recoverable is included at the amounts receivable at the balance sheet date.

1.13 Cash at bank and in hand

Cash at bank and cash in hand includes cash and short-term highly liquid investments with a short maturity of three months or less from the date of acquisition or opening of the deposit or similar account.

1.14 Creditors

Creditors and provisions are recognised where: i) the charity has a present obligation resulting from a past event that will probably result in the transfer of funds to a third party; and ii) the amount due to settle the obligation can be measured or estimated reliably. Creditors and provisions are recognised at their settlement amount after allowing for any trade discounts due.

1.15 Financial instruments

The charity has financial assets and financial liabilities only of a kind that qualify as basic financial instruments. The treatment of these instruments is described in the accounting policies above.

1.16 Pensions

The charity operates a defined contribution pension scheme and the pension charge represents the amounts payable by the charity to the fund in respect of the year.

1.17 Operating leases

The charity classifies its leases of equipment as operating leases: the title to the equipment remains with the lessor, and the lease term is typically five years whilst the economic life of such equipment is in excess of this. The charity also leases a number of premises from which it operates charity thrift stores; these are also considered operating leases with a term of three to five years. Rental charges are charged on a straight line basis over the term of the lease.

1.18 Taxation

The charity is considered to pass the tests set out in Paragraph 1 Schedule 6 of the Finance Act 2010 and therefore it meets the definition of a charitable company for UK corporation tax purposes. Accordingly, the charity is potentially exempt from taxation in respect of income or capital gains received within categories covered by Chapter 3 Part 11 of the Corporation Tax Act 2010 or Section 256 of the Taxation of Chargeable Gains Act 1992, to the extent that such income or gains are applied exclusively to charitable purposes. Wood Green Enterprises Limited makes qualifying donations of all taxable profits to the charity at the discretion of the directors. No corporation tax liability arises in the accounts.

1.19 Accounting estimates and judgements

Preparation of the accounts requires the Trustees and management to make judgements and estimates.

The items in the accounts where the most significant judgements and estimates have been made include:

- Income recognition of legacies
- Provisions that relate to dilapidation of charity shops
- Estimates in respect of accrued income
- Estimating the useful economic life of tangible fixed assets

2. Donations and legacies

	Unrestricted 2022 £'000	Restricted 2022 £'000	Total funds 2022 £'000	Unrestricted 2021 £'000	Restricted 2021 £'000	Total funds 2021 £'000
Donations	5,759	11	5,770	5,139	15	5,154
Legacies	7,352	-	7,352	4,438	108	4,546
	13,111	11	13,122	9,577	123	9,700

In addition to the legacy income recognised in the SOFA, the charity has been notified of 106 residuary legacies (2021: 84) with a total estimated value of £8,751,000 (2021: £4,931,000). These legacies do not satisfy the criteria to recognise the income during the year. They are therefore disclosed as a contingent asset.

3. Income from charitable activities

	2022 £'000	2021 £'000
Income from animal placements	189	156
Clinic and other services	9	5
	198	161

All income from charitable activities received in 2022 and 2021 are unrestricted funds.

4. Income from other trading activities

	2022 £'000	2021 £'000
Charity shops	2,635	741
Retail government support grants	76	612

Governance	3	3	-	10	3	19
Total cost	6,068	2,308	80	5,085	1,885	15,426

Direct expenditure on charitable activities includes £5,261,000 (2021: £5,160,000) spent from unrestricted funds and £6,000 (2021: £67,000) spent from restricted funds. All expenditure on support costs and raising funds is from unrestricted funds in 2022 and 2021. Support costs cannot be attributed to a single activity and have therefore been apportioned between the activities supported on the basis of full-time equivalent staff numbers.

7. Net expenditure

This is stated after charging:

	Group 2022 £'000	Group 2021 £'000	Charity 2022 £'000	Charity 2021 £'000
Depreciation of fixed assets	675	641	675	638
Auditors remuneration for:				
Audit services	24	19	17	17
Tax compliance services	3	3	2	2
Operating lease payments	400	725	400	725

8. Staff costs and key management personnel

Staff costs were as follows:

	2022 £'000	2021 £'000
Wages and salaries	7,166	6,615
Social security costs	636	575
Other pension costs	385	314
Redundancy and termination costs	28	55
Apprenticeship levy	18	18
Total staff costs	8,233	7,577

The average number of employees (full-time equivalent) during the year was as follows:

	2022 No.	2021 No.
Direct charitable activities	151	141
Raising funds	82	67
Support and administration	44	39
Total staff	277	247

The average number of employees (headcount) during the year was as follows:

	2022 No.	2021 No.
Direct charitable activities	177	172
Raising funds	94	75
Support and administration	47	43
Total staff	318	290

The number of higher paid employees was:

	2022 No.	2021 No.
In the band £60,001 to £70,000	3	2
In the band £70,001 to £80,000	2	2
In the band £80,001 to £90,000	-	1
In the band £90,001 to £100,000	1	1
In the band £100,001	1	-

During the year, no Trustees received any remuneration (2021: £Nil). No reimbursement of travel expenses were made or are due to be made to any trustee in respect of the year (2021: £Nil).

The charity considers its key management personnel to be the chief executive and the Senior Leadership team. During the year, the total employment benefits of key management personnel was £654,000 (2021: £546,000).

During the year the charity paid a total of £29,000 (2021: £55,000) in redundancy and termination payments in respect of 1 employee (2021: 18 employees). The termination payments were all in cash and are a combination of compulsory and voluntary redundancy payments plus payments under settlement agreements.

Employer pension costs for higher paid employees totalled £42,000 (2021: £31,000).

During the year, Directors and Officers insurance was purchased to indemnify the Council of Management against default on their part. The cost of insurance amounted to £3,106 (2021: £4,500).

At 31 March 2022	310	313	623
<u>Comprising</u>			
Historic cost	62	158	220
Revaluation	248	155	403
At 31 March 2022	310	313	623

The properties were last formally revalued, at open market value, by the Council as at 31st March 2018. The Council has considered the valuation of the freehold investment property as at 31 March 2022 considering the prices of sold properties in the area and has recognised a gain of £60,000. In respect of the leasehold investment property, the Council believes that the 2022 open market valuation is not materially different from the value included in the financial statements.

12. Fixed asset investments

Market value	GROUP 2022 Total £'000	GROUP 2021 Total £'000	CHARITY 2022 Total £'000	CHARITY 2021 Total £'000

Total investments	13,535	13,214	13,540	13,219

The charity holds a portfolio of listed investments, revalued to the market value at the balance sheet date. The gain or loss on this revaluation is realised once the investment is sold. The historical cost of listed investments held by the Group is £9,696,000.

The charity owns 100% of the £1 ordinary share capital of Wood Green Enterprises Limited, incorporated in England and Wales. Shares in group undertaking is £5,000. The results of the company have been consolidated into these financial statements. See Note 21 for a summary of the results of Wood Green Enterprises Limited.

Listed securities held at 31 March 2022 comprised the following asset classes:

	Value 2022 £'000	Percentage 2022 %	Value 2021 £'000	Percentage 2021 %

TOTAL FUNDS	24,205	12,846	(15,426)	-	2,555	24,180

Included within General funds carried forward is £9,732 (2021: £14,361), which relates to Wood Green Enterprises Limited, a subsidiary of the Charity.

16.1 Restricted funds

The Ms Snowden fund is a restricted legacy providing funding for the new cattery. The cattery was completed in 2022 and all restricted funds utilised.

The P Larratt fund is a restricted in-memory donation primarily providing funding for a cats training and behaviour manager and a community outreach advisor.

The Surgical Equipment restricted income was generated from the Spring 2020 appeal and the balance will be spent in the next financial year.

The Other restricted funds are restricted funds that individually are immaterial.

16.2 Designated funds

Tangible fixed asset fund

This represents the net book value of the land, buildings, motor vehicles and equipment owned and used by the charity to run its operations and administer the organisation.

Other designated funds are subject to an annual review to reflect changes in the charity's plans.

Strategic projects

The charity spent the remaining £80,000 of designated funds within the year on various projects.

Infrastructure reserve

This fund was used to fund part of the costs of the new cattery along with the legacy from Ms Snowden and a fundraising campaign. The infrastructure reserve will be reviewed annually.

16.3 Revaluation reserve

The revaluation reserve represents the revaluation of the investment properties and investments held by the charity. Included within the revaluation reserve carried forward is £403,000 (2021 - £343,000), which relates to the revaluation of investment properties and £2,887,000 (2021 - £3,677,000), which relates to the unrealised gain on listed investments.

17. Analysis of net assets between funds

	Unrestricted 2022 £'000	Restricted 2022 £'000	Total funds 2022 £'000	Unrestricted 2021 £'000	Restricted 2021 £'000	Total funds 2021 £'000

Decrease/(Increase) in stocks	5	(23)
Increase in debtors	(619)	(57)
Increase in creditors/provisions	591	270
Net cash used in operating activities	(714)	(2,146)

19. Pension commitments

The charity operates a defined contribution pension scheme. The assets of the scheme are held separately from those of the charity in an administered fund. The pension charge represents contributions payable by the charity to the fund. Contributions outstanding at 31 March 2022 were £Nil (2021: £Nil), none of which were overdue. Total employer contributions paid in the year were £428,000 (2021: £314,000).

20. Operating lease commitments

As at 31 March 2021 the group had total commitments under non-cancellable operating leases as follows:

GROUP	Land and buildings 2022 £'000	Other 2022 £'000	Land and buildings 2021 £'000	Other 2021 £'000

21. Principal subsidiaries

Percentage shareholding

Company name

Wood Green Enterprises Limited (Company no. 03161812)

100

The charity owns 5,000 £1 ordinary shares in Wood Green Enterprises Limited, King's Bush Farm, London Road, Godmanchester, Huntingdon, PE29 2NH, which is incorporated in England and Wales. The subsidiary operated a coffee shop, conference facility and restaurant at King's Bush Farm, Godmanchester, but these activities were discontinued permanently in March 2020. It continues to receive commission on pet insurance and trades in surplus electricity produced at the Godmanchester site. This is the charity's only subsidiary.

Wood Green Enterprises Limited gifts its taxable profits to Wood Green Animal Shelters at the discretion of the Directors. A summary of the company's trading results is shown below. Audited accounts have been filed with the Registrar of Companies.
